Business Requirements Document (BRD) for "PROJECT"

2 1. Introduction

1.1 Purpose

This document describes the functionalities and features of the "Shelfspots" system. It outlines technical dependencies, system capabilities, and intended outcomes to ensure clear communication with stakeholders. **The primary focus of this document is to define and develop the Minimum Viable Product (MVP).**

1.2 Document Conventions

- **Font Type:** Times New Roman
- **Main Headings:** Font size 18, bold
- **Subheadings:** Font size 14, bold
- **Paragraphs:** Font size 12

1.3 Intended Audience

This document is designed for:

- Developers
- Project Managers
- Non-technical stakeholders
- End users

It uses straightforward language to ensure comprehension by diverse readers.

1.4 Project Scope

The "Shelfspots" system connects service providers (freelancers) with service requesters (companies) based on geolocation and availability. The goal is to:

- Enhance cost-efficiency for companies
- Increase income and flexibility for freelancers
- Deliver reliable and user-friendly service recommendations
- Expand capabilities to various service fields

This phase of the project is limited to the MVP, focusing on the core functionalities required to demonstrate value and achieve early feedback. For freelancers, the MVP will be developed as a Progressive Web Application (PWA) to reduce costs and development time while maintaining functionality across devices.

2. Business Objectives

The primary objectives are:

- **Cost Efficiency:** Reduce costs for companies.
- **Income Opportunities:** Provide freelancers with flexible work opportunities.
- **Geolocation Matching:** Connect users based on location.
- **Enhanced User Experience:** Ensure a simple and intuitive interface.
- **Reliability:** Deliver accurate and dependable service recommendations.

3. Stakeholder Requirements

3.1 Service Requesters (Companies)

- Internet connectivity
- Account creation and login
- Upload a picture and information for the product requiring service
- Location and store selection
- Service type specification
- Confirmation

3.2 Service Providers (Freelancers)

- Internet connectivity
- Location tracking enabled
- Account creation and login
- Notifications for service requests

- Accept/reject options for requests
- Evidence submission upon service completion

3.3 Administrators

- Manage user accounts
- Add, edit, or delete tasks
- Oversee system functionality

4. Project Scope

4.1 In-Scope

- User registration and authentication
- Geolocation services
- Task management (admin)
- Secure communication interfaces
- Performance and security standards

4.2 Out-of-Scope

- Integration with unmentioned third-party services
- Custom features for specific industries unless specified

The current scope is limited to MVP functionalities necessary to establish the basic system workflows and ensure smooth operation. The freelancer platform will be developed as a PWA to optimize for cost and time while supporting mobile functionality.

5. Functional Requirements

User Features

- **Registration/Login:** Create and log into accounts
- **Password Reset:** Reset forgotten passwords
- **Profile Management:** Edit user profile details

Company Features

- **Service Options:** Companies can request the following services:
 1. Home shelf display

2. Secondary display implementation
 3. On-shelf availability
- **Product Upload:** Upload a picture and product details for services

Admin Features

- **Task Management:** Add, edit, and delete tasks
- **User Management:** Manage user accounts

Matching Features

- **Geolocation-Based Matching:** Connect service providers and requesters
- **Notification System:** Alert users to relevant updates

Freelancer-Specific Features

- **Task Acceptance:** Accept/reject tasks
- **Check-In:** Start service upon reaching location
- **Evidence Upload:** Submit before/after photos
- **Service Time Management:** Extend time when necessary

6. Non-functional Requirements

6.1 Performance

- Stable internet connection
- Consistent data availability
- System reliability

6.2 Security

- Encrypted passwords
- Identity verification via OTP
- Limited access for admin and database roles

6.3 Accessibility

- Compatible with iOS, Android, and web browsers
- User-friendly interface for all roles
- PWA functionality for freelancers

7. Assumptions and Dependencies

- Users will have stable internet access.
- System integrates with Google Maps and a payment gateway.
- Data storage includes cloud and local options.

8. Constraints

- Must adhere to SSL and HTTPS protocols.
- Compatibility with iOS and Android devices.

9. User Interface Requirements

- Intuitive design tailored for each user role (e.g., company, freelancer, admin).
- Clear navigation paths and feedback mechanisms.

10. Workflow Overview

10.1 Company Process

Register and log in.

Upload a picture and product details for the service.

Choose between Planned or Ad Hoc service.

Fill out the request form:

Service type

Location details (state, region, city, district)

Brand, channel, customer

For planned requests: Date and time

Submit the request.

Review service completion evidence and provide feedback.

10.2 Freelancer Process

Register and log in.

Accept Location tracking

Receive task notification based on location.

Accept or reject the task.

Check in at the service location.

Perform the task and upload evidence.

Submit task completion and receive payment.

USE Cases:

Sign up “All Users”

<i>Feature name</i>	Sign up	
<i>Description</i>	This feature will allow the users to create account to be able to access our system	
<i>Priority</i>	<i>Fundamental</i>	
<i>Requirements ID</i>	<i>R1</i>	
<i>Stimulus</i>		<i>Response</i>
<i>Clicking on the create a new account button</i>		<i>Redirecting the user to the sign-up page to fill their data and create their account</i>

Sign in “All Users”

<i>Feature name</i>	Sign in	
<i>Description</i>	This feature will allow the users to enter their username and password to access our system	
<i>Priority</i>	<i>Fundamental</i>	
<i>Requirements ID</i>	<i>R2</i>	
<i>Stimulus</i>		<i>Response</i>
<i>Entering the username and password and submitting</i>		<i>Validate the username and password then redirecting them to the home page</i>

Password reset “All Users”

Feature name	Password reset	
Description	This feature will allow the users to reset their password	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R3</i>	
Stimulus	Response	
<i>Pressing on the reset password button</i>	<i>Redirect the user to the password reset page and validate their input</i>	

Log out “All Users”

Feature name	Log out	
Description	This feature will allow the users to log out of the system to protect their data and privacy	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R4</i>	
Stimulus	Response	
<i>Pressing on the log out button</i>	<i>Redirect the user to the sign in page and remove the device's access until the next log in is validated</i>	

Individual

Edit profile “Individual”

Feature name	Edit profile	
Description	This feature will allow the users to edit their information related to their account on our system	
Priority	Fundamental	
Requirements ID	R5	
Stimulus	Response	
Pressing on the edit profile button	Redirect the user to the profile page and allow them to edit their information and save changes	

Accept Request

Feature name	Accept Request	
Description	This feature will allow user “Individuals” to accept the request.	
Priority	Fundamental	
Requirements ID	R6	
Stimulus	Response	
Pressing “Accept” on the prompted notification.	Redirect the user to the Accepting Page which shows the Location and the summary of the request + Start the timer for the check in “15 minutes” count down.	

Reject Request

Feature name	<i>Reject Request</i>	
Description	This feature will allow user “Individuals” to reject the request.	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R7</i>	
Stimulus	Response	
<i>Pressing “Reject” on the prompted notification.</i>	<i>Reject the request and send back to the system.</i>	

Extend Time

Feature name	Extend Time	
Description	This feature allows the user “Individual” to Extend the time; Either the reach to the store timer OR Service time timer by adding more time to the counter	
Priority	<i>NOT Fundamental</i>	
Requirements ID	<i>R8</i>	
Stimulus	Response	
<i>Pressing “Extend Time” button on the promoted notification</i>	<i>Add 15 OR 5 Minutes to the timer</i>	

Check in

Feature name	Check in	
Description	This feature allows the users “Individual” to check in in the store to begin the services providing.	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R9</i>	
Stimulus	Response	
Click “Check-In” Button	Capture the user location and check if they reach to location of the service or not + Start the Services timer.	

Upload Picture

Feature name	Upload Picture	
Description	This allows the user “Individual” to upload a picture to the services requester “Company”	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R10</i>	
Stimulus	Response	
Click on “Upload”	Open the Camera of the user and upload the picture to the services requester.	

Submit Invoice “NOT MVP”

Feature name	Submit Invoice
---------------------	----------------

Description	This feature allows the user “Individual” to Submit the evidence that the services has been provided.
Priority	<i>Fundamental</i>
Requirements ID	<i>R11</i>
Stimulus	Response
<i>Click on “Submit Completion”</i>	<i>Send Notification to the service requester with the Summary, Cost and uploads of the services provider.</i>

Provide Feedback “Both Users”

Feature name	Provide Feedback
Description	This feature allows the user to provide feedback on Services requester, Services provider, Store the service has been provided in, the platform and the application.
Priority	<i>Maybe Fundamental</i>
Requirements ID	<i>R12</i>
Stimulus	Response
<i>Answer with Stars on the prompted window.</i>	<i>Save the feedback and change the rate accordingly.</i>

Company

Plan

Feature name	Choose a plan	
Description	This feature allows the user to choose either “Planned OR Ad Hoc” plan.	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R13</i>	
Stimulus	Response	
<i>Click on either “Planned” OR “Ad Hoc” and form changes accordingly.</i>	<i>Change on the requirements of the form depending on the choice.</i>	

Submit a request

Feature name	Submit a request	
Description	This feature allows the users “Company” to submit their request and send it to the nearest services provider to the Store chosen.	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R14</i>	
Stimulus	Response	
<i>Click on “Submit a Request”</i>	<i>Open the Form of the request page.</i>	

Add Additional Service

Feature name	Add Additional Service	
Description	This feature allow the user to add additional service to be requested and distributed accordingly.	
Priority	<i>NOT Fundamental</i>	
Requirements ID	<i>R15</i>	
Stimulus	Response	
Click on “Add Additional Service”	Reopen the “Form of request”	

Confirm Request

Feature name	Confirm Request	
Description	This feature allows the user to confirm their request and send it with NO editing after confirmation.	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R16</i>	
Stimulus	Response	
Click on “Confirm Request”	Open request Summary Page + Submit request to the system.	

Review Service

Feature name	Review Services	
Description	This feature allows the user to review the service provided by opening the Pictures uploaded by the “Individual”	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R17</i>	
Stimulus		Response
<i>Click on “Review Service” button</i>		<i>Open the uploads from the services provider.</i>

Editing Tasks “Company” “NOT MVP”

Feature name	Editing Task	
Description	This feature will allow the user to input their needed tasks and get provided with a service provider nearest to the location located in the request.	
Priority	<i>NOT Fundamental</i>	
Requirements ID	<i>R18</i>	
Stimulus		Response
<i>filing the data needed such as location and task type</i>		<i>Updating the user task with the latest data provided</i>

Cancel Request “NOT MVP”

Feature name	<i>Cancel Request</i>	
Description	This feature will allow user “Company” to cancel their request.	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R19</i>	
Stimulus	Response	
<i>Pressing “Cancel Request” on the summary page.</i>	<i>Prompted a warning window + Cancel request from system.</i>	

ADMIN

Edit user (admin)

Feature name	Edit user	
Description	This feature will allow the admin to Edit users and update some general details to the database	
Priority	<i>Fundamental</i>	
Requirements ID	<i>R20</i>	
Stimulus	Response	
<i>Pressing edit user after selecting the user</i>	<i>Displaying user general data to be updated.</i>	

Delete user (admin)

<i>Feature name</i>	Delete user	
<i>Description</i>	This feature will allow the admin to delete users from the database	
<i>Priority</i>	<i>Fundamental</i>	
<i>Requirements ID</i>	<i>R21</i>	
<i>Stimulus</i>		<i>Response</i>
<i>Pressing delete user after selecting the user</i>		<i>Deleting the user from the database.</i>

Manage accounts (admin)

<i>Feature name</i>	Manage accounts	
<i>Description</i>	This feature will allow the admin to manage accounts and update the permissions of the admins and users.	
<i>Priority</i>	<i>Fundamental</i>	
<i>Requirements ID</i>	<i>R22</i>	
<i>Stimulus</i>		<i>Response</i>
<i>Accessing the Manage tab in the admin dashboard</i>		<i>Displaying account and permissions to edit and manage.</i>

Requests Overview

<i>Feature name</i>	Request overview	
<i>Description</i>	This feature will allow user “Admin” to overview the whole requests	
<i>Priority</i>	<i>Fundamental</i>	
<i>Requirements ID</i>	<i>R23</i>	
<i>Stimulus</i>		<i>Response</i>
<i>Pressing “Requests Overview”</i>		<i>Redirect the user to the Requests overview Page which shows all the requests which are active and all the details for each request.</i>

Information needed by freelancers' users:

Data Requested from freelancers:	
Name	MVP
